# Better Web Typography for a Better Web

Typography is an essential part of web design. It can make or break the user experience, and it can have a significant impact on your site's overall look and feel. Unfortunately, many web designers don't give typography the attention it deserves. They often use default fonts, sizes, and colors, without putting much thought into how they will affect the user.

This book will teach you everything you need to know about web typography. You'll learn how to choose the right fonts, sizes, and colors for your site. You'll also learn how to use typography to create visual hierarchy and improve the readability of your text.
