Designers have the power to shape our world in profound ways. They can create products and services that make our lives easier, more enjoyable, and more sustainable. They can also design systems and policies that promote social justice and equity. But with great power comes great responsibility.

Citizen Designer: Perspectives on Design Responsibility is a groundbreaking book that examines the role of designers in shaping our world. This book argues that designers have a responsibility to use their skills to create a more just, equitable, and sustainable society.

Featuring contributions from leading designers, scholars, and activists, *Citizen Designer* is an essential read for anyone who cares about the future of design.

The Role of Designers in the 21st Century

In the 21st century, designers are facing a number of unprecedented challenges.

- **The climate crisis:** The climate crisis is one of the most pressing challenges facing humanity. Designers can play a vital role in mitigating the effects of climate change by creating sustainable products, services, and systems.
- **The rise of inequality:** Inequality is a growing problem around the world. Designers can use their skills to create products and services that are accessible to everyone, regardless of their income or background.
- **The erosion of democracy:** Democracy is under threat around the world. Designers can use their skills to create tools and platforms that promote civic engagement and empower citizens.

These are just a few of the challenges that designers are facing in the 21st century. As designers, we have a responsibility to use our skills to create a better world for all.

Design for Good

Design for good is a movement that is gaining traction around the world. Design for good is about using design to create positive social and environmental impact.

There are many different ways that designers can use their skills for good.

- **Design for accessibility:** Designers can create products and services that are accessible to everyone, regardless of their abilities or disabilities.
- **Design for sustainability:** Designers can create products and services that are sustainable and minimize their environmental impact.
- **Design for social justice:** Designers can use their skills to create products and services that promote social justice and equity.

Design for good is not just about doing good deeds. It is also about creating good business. Companies that design for good are more likely to be successful in the long run because they are meeting the needs of their customers and the world around them.

Design has the power to change the world. Designers have a responsibility to use their skills to create a more just, equitable, and sustainable society.

Citizen Designer: Perspectives on Design Responsibility is an essential read for anyone who cares about the future of design.
