

# Foy Short: A Life in Southern Africa

Foy Short was a man of many talents and passions. He was a conservationist, explorer, photographer, and writer, and he dedicated his life to understanding and preserving the natural wonders of Southern Africa. Born in England in 1915, Short first came to Africa in 1939 as a young man. He was immediately captivated by the continent's beauty and diversity, and he soon began to explore its remote corners. In the years that followed, Short made numerous expeditions into the African wilderness, often traveling alone and on foot. He was one of the first Europeans to document the lives of the San people, and he also played a key role in the establishment of several national parks and wildlife reserves in Southern Africa.

Short's work as a conservationist was groundbreaking. He was one of the first people to recognize the importance of protecting entire ecosystems, rather than just individual species. He also understood the need to involve local communities in conservation efforts. Short's work had a major impact on the development of conservation policy in Southern Africa, and he is considered one of the founders of the modern conservation movement. In addition to his work as a conservationist, Short was also a gifted photographer and writer. His photographs of African wildlife and landscapes are stunning, and his books and articles have helped to inspire generations of conservationists. Short's writing is clear, concise, and often humorous, and he has a knack for bringing the natural world to life for his readers.

Foy Short died in 2004, but his legacy lives on. His work helped to shape the way we think about conservation, and his writings and photographs continue to inspire people around the world. He was a true pioneer, and his contributions to the understanding and preservation of Southern Africa are immeasurable.

To learn more about Foy Short and his work, I recommend reading his book, *Life in Southern Africa*. This book is a collection of Short's writings and photographs, and it provides a fascinating glimpse into the life and work of one of the most important conservationists of the 20th century.
