Chapter 1: Dr. Harry Lew – The Pioneer of Chinese Dermatology

Born in 1891 in the shadow of San Francisco's Chinatown, Dr. Harry Lew's path was fraught with challenges. However, his unwavering determination and passion for medicine propelled him to become the first Chinese American to specialize in dermatology. Through his groundbreaking research and tireless advocacy, he dedicated his life to improving the skin health of marginalized communities, leaving a lasting legacy in both medicine and social justice.

Chapter 2: Dr. Mabel Ping-Hua Lee – A Trailblazer in Cancer Research

As the first Chinese American woman to earn a medical degree from Yale University, Dr. Mabel Ping-Hua Lee faced countless obstacles. Undeterred, she persevered and went on to become a renowned cancer researcher, known for her pioneering work in chemotherapy. Her tireless efforts paved the way for breakthroughs in cancer treatment, saving countless lives and transforming the landscape of oncology.

Chapter 3: Dr. Paul Ho – The Heart Surgeon with a Golden Touch

Dr. Paul Ho, a world-renowned cardiac surgeon, emerged from humble beginnings in pre-war China. Driven by his desire to heal and innovate, he developed the revolutionary Ho BioGlue, a medical adhesive that has transformed heart surgery. Dr. Ho's groundbreaking invention has saved countless lives and continues to advance cardiovascular surgery worldwide.

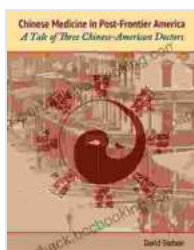

Legacy and Impact: Inspiration for Generations

The 'Tale of Three Chinese American Doctors' is not merely a history book; it is a testament to human resilience, ambition, and the power of representation. These doctors shattered cultural barriers, overcame prejudice, and made invaluable contributions to medicine and society. Their stories serve as beacons of inspiration, encouraging generations of Asian Americans to pursue their dreams and make their own mark on the world.

Call to Action: Join the Legacy

The legacy of the three doctors profiled in this book is a reminder of the boundless potential that exists within the Chinese American community. It is our responsibility to honor their legacy by supporting diversity and inclusion in medicine, encouraging aspiring doctors from all backgrounds, and creating a healthcare system that reflects the rich tapestry of our society. Together, we can ensure that the stories of the next generation of trailblazing Chinese American doctors will continue to inspire and transform the world.
